Ikwezi Municipality **ANNUAL FINANCIAL STATEMENTS**

for the year ended 30 June 2013

Approval of annual financial statements

I am responsible for the preparation of these annual financial statements, which are set out on pages x to x, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality. I certify that the salaries, allowances and benefits of Councillors, loans made to Councillors, if any, and payments made to Councillors for loss of office, if any, as disclosed in note 28 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

Municipal Manager:

1. Basis of preparation of the Annual Financial Statements

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. These annual financial statements have been prepared in accordance with the Generally Recognised Accounting Practice (GRAP) issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

Accounting policies for material transaction, events or conditions not covered by the above GRAP Standards have been developed in accordance with paragraph 7,11 and 12 of GRAP 3. These accounting policies and the applicable disclosures have been based on the Generally Recognised Accounting Practices (GRAP) including any interpretations of such Statements issued by the Accounting Practices Board.

The Accounting Standards Board has set transitional provisions for individual standards of GRAP as set out in Directive 4 issued in March 2009. Details of the transitional provisions applicable to the municipality have been provided in the notes to the annual financial statements.

A summary of the significant accounting policies which have been consistently applied except where transitional provisions has been granted are disclosed below.

The Annual Financial Statements are presented in South African Rand, rounded off to the nearest Rand which is the Municipality's functional currency.

1.2 Going concern assumption

These annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Standards, amendments to standards and interpretations issued but not yet effective

The following GRAP standards have been issued and have been adopted by the municipality as noted below:

GRAP 18 Segment Reporting issued March 2005 -

GRAP 21 Impairment of Non - Cash - generating - assets June 2013

GRAP 23 Revenue from Non - Exchange Transactions - June 2013

GRAP 24 Presentation of Budget information - June 2013

GRAP 26 impairment of Cash - generating - assets - June 2013

P 103 Heritage Assets issued July 2008 -

GrovP 25 Employee Benefits issued 11 January 2009 -

1.4 Change in accounting policies and comparability

Accounting Policies have been consistently applied, except where otherwise indicated below:

The details of any resulting changes in accounting policy and comparative restatements are given in note 32 to the Annual Financial Statements.

The municipality changes an accounting policy only if the following instances:

(a) Is required by a Standard of GRAP; or

(b) Results in the financial statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the entity's financial position, financial performance or cash flow. The details of any changes in accounting policies and comparative restatements are explained in the relevant policy.

1.5 Property, plant and equipment

1.5.1Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others (other than investment property), or for administrative purposes, and are expected to be used

during more than one year. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non - exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use

during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

1.5.2 Subsequent measurement - cost modei

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life. Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

1.5.3 Depreciation and Impairment

Depreciation is calculated on the depreciable amount, using the straight - line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Roads and Paving 30 years
Storm Water Drainage 20 years
Community Assets:
Buildings 30 years
Recreational Facility 20-30 years
Community Halls 30 years
Libraries 30 years
Parks and gardens 10 years
Finance Lease Assets:
Office equipment 4 years

Other Assets:
Buildings 30 years
Specialist vehicles 10 years
Other vehicles 5 years
Office equipment 3-7 years
Furniture and fittings 7-10 years
Bins and containers 5 years
Specialised plant and equipment 10-15 years
Landfill sites 15 years

Computer equipment 3 years

The residual value, the useful life of an asset and the depreciation method is reviewed annually and any changes are recognised as a change in accounting estimate.

The municipality tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

items of Property, plant and equipment are derecognised when the asset is disposed of or when there are no further omic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

The Municipality has taken advantage of the transitional provisions permitted by the Accounting Standards Board, as set out in Directive 4 issued in March 2009 as follows:

GRAP 1 Presentation of Financial Statements - paragraphs 7-8A

GRAP 9 Revenue from Exchange Transactions - paragraphs 37-38

GRAP 13 Leases - paragraphs 55-60

GRAP 17 Property, Plant and Equipment - paragraphs 73-83

GRAP 19 Provisions, Contingent Liabilities and Contingent Assets - paragraph 93-94E

GRAP 102 Intangible Assets - paragraph 110-118

in accordance with the transitional provision as per Directive 4 of the GRAP Reporting Framework, where property, plant & equipment was acquired through a transfer of functions, the municipality is not required to measure that property, plant & equipment for a period of three years from the effective date of the transfer of functions or the effective date of the Standard, whichever is later.

The municipality acquired a transfer(s) of function in 2010 and property, plant & equipment has accordingly been recognised at provisional amounts, as disclosed in 6. The transitional provision expires on 30 June 2012.

Due to the impact of Directive 4 being adopted and the core criteria of all assets being exempt for measurement, for and impact of the next three financial years impairment and depreciation assessments will not be considered.

1.6 investment property

1.6.1 Initial recognition

Investment property includes property (land or a building, or part of a building, or, both, land or buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations.

At initial recognition, the municipality measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non - exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition. The cost of self - constructed investment property is the cost at date of completion.

1.6.2 Subsequent measurement - cost modei

Investment property is measured using the cost model and a revaluation will be performed once every five years. Under the cost model, investment property is carried at its depreciated re-valued amount less impairments at the reporting date. Any gain or loss arising from the revaluation is included in revaluation reserve.

The Municipality has taken advantage of the transitional provisions permitted by the Accounting Standards Board, as set out in Directive 4 issued in March 2009 as follows:

GPAP 1 Presentation of Financial Statements - paragraphs 7-8A

9 Revenue from Exchange Transactions - paragraphs 37-38

GRAP 13 Leases - paragraphs 55-60

GRAP 16 Investment property - paragraphs 63-70

GRAP 17 Property, Plant and Equipment - paragraphs 73-83

GRAP 19 Provisions, Contingent Liabilities and Contingent Assets - paragraph 93-94E

GRAP 102 intangible Assets - paragraph 110-118

In accordance with the transitional provision as per Directive 4 of the GRAP Reporting Framework, where investment property was acquired through a transfer of functions, the municipality is not required to measure that investment property for a period of three years from the effective date of the transfer of functions or the effective date of the Standard, whichever is later. The transitional provision expires on 30 June 2012.

Due to the impact of Directive 4 being adopted and the core criteria of all assets being exempt for measurement, for and including the next three financial year's impairment and depreciation assessments will not be considered.

1.7 Intangible assets

1.7.1 Initial recognition

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licenses, and development costs. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- The municipality intends to complete the intangible asset for use or sale;
- It is technically feasible to complete the intangible asset;
- The municipality has the resources to complete the project; and
- it is probable that the municipality will receive future economic benefits or service potential. intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non - exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset's) given up.

1.7.2 Subsequent measurement - cost model

intangible assets are subsequently carried at cost less accumulated amortisation and impairments. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

IKWEZI LOCAL MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2013

Accounting Policies (continued)

1.7.3 Amortisation and impairment

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight line method.

The annual amortisation rates are based on the following estimated average asset lives:

Computer software 5 years

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financiai Performance.

The municipality tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

The Municipality has taken advantage of the transitional provisions permitted by the Accounting Standards Board, as set out in Directive 4 issued in March 2009 as follows:

GPAP 1 Presentation of Financial Statements - paragraphs 7-8A

9 Revenue from Exchange Transactions - paragraphs 37-38

GRAP 13 Leases - paragraphs 55-60

GRAP 17 Property, Plant and Equipment - paragraphs 73-83

GRAP 19 Provisions, Contingent Liabilities and Contingent Assets - paragraph 93-94E

GRAP 102 Intangible Assets - paragraph 110-118

In accordance with the transitional provision as per Directive 4 of the GRAP Reporting Framework, where intangible assets was acquired through a transfer of functions, the municipality is not required to measure that intangible asset for a period of three years from the effective date of the transfer of functions or the effective date of the Standard, whichever is later. The transitional provision expires on 30 June 2012.

Due to the impact of Directive 4 being adopted and the core criteria of all assets being exempt for measurement, for and including the next three financial year's impairment and amortisation assessments will not be considered.

1.8 Value added tax

The Municipality accounts for Value Added Tax on the payments basis. This means that VAT is declared to the South African Revenue Services as input VAT or output VAT only when payments are made to suppliers or payments are received for goods or services.

The net output VAT on debtors where money has not been received or creditors where payment has not yet been made is sed separately in the Statement of Financial Position in terms of GRAP 1.

1.9 Leases

1.9.1 Municipality as lessee

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality. Property, plant and equipment or intangible assets subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of Interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant, equipment or intangibles. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are accrued on a straight-line basis over the term of the relevant lease.

The municipality changed its accounting policy for leases in 2010. The change in accounting policy is made in accordance

IKWEZI LOCAL MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2013

Accounting Policies (continued)

1.9.2 Municipality as lessor

Under a finance lease, the municipality recognises the lease payments to be received in terms of a lease agreement as an asset (receivable). The receivable is calculated as the sum of all the minimum lease payments to be received, plus any unguaranteed residual accruing to the municipality, discounted at the interest rate implicit in the lease.

The receivable is reduced by the capital portion of the lease instalments received, with the interest portion being recognised as interest revenue on a time proportionate basis.

The accounting policies relating to de-recognition and impairment of financial instruments are applied to lease receivables. Rental income from operating leases is recognised on a straight -line basis over the term of the relevant lease.

1.10 Revenue recognition

1.10.1 Revenue form exchange transactions

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly be on the recorded number of refuse containers per property.

p artionate basis.

Interest revenue is recognised on a time proportion basis.

IKWEZI LOCAL MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2013

Accounting Policies (continued)

Revenue from the rental of facilities and equipment is recognised on a straight - line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licenses and permits.

1.10.2 Revenue from non - exchange transactions

Revenue from non - exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non - exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no ilability to repay the amount.

Fines constitute both spot fines and summonses. Revenue from spot fines and summonses is recognised when payment is received.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are runnised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, a deferred income (liability) is recognised. Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible Councillors or officials is virtually certain.

1.10.3 Grants, transfer and donations

Grants, transfers and donations received or receivable are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional.

The ilability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

1.11 Financial instruments

Initial recognition and measurement

1.11.1 Initial recognition

Financial instruments are initially recognised at fair value plus, in the case of a financial asset or a financial liability not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

1.11.2 Subsequent measurement

Financial Assets are categorised according to their nature as either financial assets at fair value through profit or loss, heid to maturity, loans and receivables, or available for sale.

Financial liabilities are categorised as either at fair value through profit or loss or financial liabilities carried at amortised cost ("other"). The subsequent measurement of financial assets and ilabilities depends on this categorisation and, in the absence of an approved GRAP Standard on Financial Instruments, is in accordance with IAS 39.

1.14-2.1 investments

Itments, which include listed government bonds, unlisted municipal bonds, fixed deposits and short -term deposits invested in registered commercial banks, are categorised as either heid - to - maturity where the criteria for that categorisation are met, or as ioans and receivables, and are measured at amortised cost.

Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified. Impairments are calculated as being the difference between the carrying amount and the present value of the expected future cash flows flowing from the instrument. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the Statement of Financial Performance.

1.11.2.2 Trade and other receivables

Trade and other receivables are categorised as financial assets: loans and receivables and are initially recognised at fair value and subsequently carried at amortised cost. Amortised cost refers to the initial carrying amount, plus interest, less repayments and impairments. An estimate is made for doubtful receivables based on a review of all outstanding amounts at year-end. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 90 days overdue) are considered indicators that the trade receivable is impaired. Impairments are determined by discounting expected future cash flows to their present value.

Amounts that are receivable within 12 months from the reporting date are classified as current. An impairment of trade receivables is accounted for by reducing the carrying amount of trade receivables through the use of an allowance account, and the amount of the loss is recognised in the Statement of Financial Performance within operating expenses. When a trade receivable is uncollectible, it is written off. Subsequent recoveries of amounts previously written off are credited against operating expenses in the Statement of Financial Performance.

1.11.2.3 Financial liabilities: trade and other payables from non exchange transactions Financial liabilities consist of trade payables and borrowings. They are categorised as financial liabilities and are held at cost, as their cost approximates their fair value.

1.11.2.4 Cash and cash equivalents

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short - term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an Insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables. Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities: other financial liabilities carried at rtised cost.

1.12 Conditional grants and receipts

Unutilised conditional grants are financial liabilities that are separately reflected on the Statement of Financial Position. They represent unspent government grants and subsidies.

1.13 Provisions

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate.

Where the effect is material, non-current provisions are discounted to their present value using a pre - tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability. The municipality does not recognise a contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses.

The present obligation under an onerous contract is recognised and measured as a provision. pvision for restructuring costs is recognised only when the following criteria over and above the recognition criteria of a provision have been met:

- (a) The municipality has a detailed formal plan for the restructuring identifying at least:
- The business or part of a business concerned;
- The principal locations affected: -

The location, function, and approximate number of employees who will be compensated for terminating their services;

- The expenditures that will be undertaken; and
- When the plan will be implemented; and
- (b) The municipality has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it...

IKWEZI LOCAL MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2013 Accounting Policies (continued)

1.14 Retirement benefits

The municipality provides retirement benefits for its employees and Councillors. Contributions are made to the South African Municipal Workers Union (SAMWU) and to the Cape Joint Provident Fund (CJPF) to fund the obligations for the payment of retirement benefits in accordance with the rules of the defined contribution funds it administers. Contributions are recognised as an expense in the statement of Financial Performance.

1.15 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003).

Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.16 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

in gular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is sequently accounted for as revenue in the Statement of Financial Performance.

1.17 Fruitiess and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in valn and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.18 Internal reserves

Capital replacement reserve (CRR)

In order to finance the provision of infrastructure and other items of property, plant and equipment from internal sources, amounts are transferred from the accumulated surplus/(deficit) to the CRR. A corresponding amount is transferred to a designated CRR bank or investment account.

The cash in the designated CRR bank account can only be utilised to finance items of property, plant and equipment. The CRR is reduced and the accumulated surplus/ (deficit) is credited by a corresponding amount when the amounts in the CRR are utilised.

1.19 Impairment of assets

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

pective of whether there is any indication of impairment, the municipality also:

- Test's intangible assets with an indefinite useful life, or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash - generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or a cash - generating unit is the higher of its fair value less costs to sell and its value in use.

if the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount.

That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any impairment loss of a re-valued asset is treated as a re-valuation decrease.

IKWEZI LOCAL MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2013

Accounting Policies (continued)

An impairment loss is recognised for cash-generating units if the recoverable service amount of the unit is less than the carrying amount of the unit.

The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

to The assets of The unit, pro rata on The basis of The carrying amount of each asset in The unit.

A municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no ionger exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods. A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a re-valued asset is treated as a revaluation increase.

The municipality changed its accounting policy for property, plant & equipment in 2010. The change in accounting policy is made in accordance with its transitional provision as per Directive 4 of the GRAP Reporting Framework.

1.20 Retirement benefits

Short - term employee benefits

Toost of short - term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non - accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

Defined contribution plans

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry - managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

Defined benefit plans

Multi employers defined benefit pension plan are treated as defined contribution plan. For defined benefit plans the cost of providing the benefits is determined using the projected credit method.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan.

Consideration is given to any event that could impact the funds up to end of the reporting period where the interim valuation is performed at an earlier date.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight line basis over the average period until the amended benefits become vested.

To extent that, at the beginning of the financial period, any cumulative unrecognised actuarial gain or loss exceeds ten percent of the greater of the present value of the projected benefit obligation and the fair value of the plan assets (the corridor), that portion is recognised in surplus or deficit over the expected average remaining service lives of participating employees.

Actuarial gains or losses within the corridor are not recognised.

Gains or losses, on the curtailment, or settlement, of a defined benefit plan is recognised when the municipality is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit

obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In surplus or deficit, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

37 CONTINGENT LIABILITY

37.1 Phil-Ann Roberts vs Ikwezi Municipality / Xola Jack

This is a sexual harassment case the plaintiff, a former female employee. Mr. Xola Jack pleaded guilty to the charge of sexual harassment and entered into an agreement with council, getting minimal sanction. The inappropriate sanction agreed on created liability for council and a sizeable claim is a possibility. this could estimate at around R 450,000.00 Including legal fees.

38 RELATED PARTIES

38.1 Party Related Transactions

The followingare persons having authority and responsibility for planning, directing and controlling the activities of the Municipality - directly or indirectly.

Executive Mayor

Councillors

Municipal Manager

Chief Financial Officer

Acting Director Corporate Services

Director Strategic Services

Director Technical and Community Services

39 RISK MANAGEMENT

39.1 Financial risk management

The Directorate: Financial services monitors and manages the financial risks relating to the operations through internal policles and procedures. These risks include interest rate risk, credit risk and liquidity risk. Compliance with policles and procedures is reviewed by internal auditors on a continuous basis, and by external auditors annually. The entity does not enter into or trade financial instruments for speculative purposes.

Internal audit, responsible for initiating a control framework and monitoring and responding to potential risk, reports quarterly to the municipality's audit committee, an independent body that monitors the effectiveness of the internal audit function.

39.2 Significant Accounting Policies

Details of the significant Accounting Policies and methods adopted, including the criteria for recognition, the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of Financial Asset, Financial Liability and Equity Instrument are disclosed in the Accounting Policies to the Annual Financial Statement

39.3 Market Risk

The municipality's activities expose it primarily to the financial risks of changes in interest rates (see Note 38.7 below). No formal policy exists to hedge volatilities in the interest rate market.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

39.4 Interest Rate Risk Management

Interest Rate Risk is defined as the risk that the fair value or future cash flows associated with a financial instrument will fluctuate in amount as a result of market interest changes.

Potential concentrations of interest rate risk consist mainly of variable rate deposit investments, long-term debtors, consumerdebtors, other debtors, and bank and cash balances.

The municipality is exposed to interest rate risk as the municipality borrows funds at both fixed and floating interest rates

39.5 Interest Rate Sensitivity Analysis

The sensitivity analysis below was determined based on the exposure to interest rates at the reporting date. For variable rate long-term instruments, the analysis is prepared assuming the amount of the instrument outstanding at the reporting date was outstanding for the whole year. A 100 basis point increase or decrease was used, which represents management's assessment of the reasonably possible change in interest rates.

The municipality's sensitivity to interest rates has decreased during the current period mainly due to the reduction in the balance of the variable rate debt instrument.

Note 2013 2012 R R

39.6 Liquidity Risk Management

Ultimate responsibility for liquidity risk management rests with the Council. The municipality manages ilquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities. The municipality has access to financing facilities.

The municipality expects to meet its other obligations from operating cash flows and proceeds of maturing financial assets.

The municipality expects to maintain current debt to equity ratio. This will be achieved through increasing tariffs and the increased use of unsecured bank loan facilities.

39.7 Credit Risk Management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the municipality.

Potential concentrations of credit risk consist mainly of fixed deposit investments, long-term debtors, consumer debtors, other debtors, short-term investment deposits and bank and cash balances.

The municipality limits its counterparty exposures from its money market investment operations (financial assets that are neither past due nor impaired) by only dealing with well-established financial institutions of high credit standing. The credit exposure to any single counterparty is managed by setting transaction / exposure limits, which are included in the municipality's Investment Policy. These limits are reviewed annually by the Chief Financial Officer and authorised by the Council.

Consumer debtors comprise of a large number of ratepayers, dispersed across different industries and geographical areas.

Ongoing credit evaluations are performed on the financial condition of these debtors. Consumer debtors are presented net of an allowance for doubtful debt.

In the case of debtors whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of penalty charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

Long-term Receivables and Other Debtors are individually evaluated annually at balance sheet date for impairment or discounting. A report on the various categories of debtors is drafted to substantiate such evaluation and subsequent impairment / discounting, where applicable.

39.8 Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

40 Going Concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. The basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The financial statements indicates that the municipality's current liabilities exceed its total currents assets by R 16 338 686. These conditions indicate the existence of a material uncertainty that may cast significant doubt on the municipality's ability to operate as a going concern.
